

NAVIGATOR SNAPSHOT REPORT

Top 3 best fit legal tech tools

Introduction

The pressure on in-house legal teams has never been higher. Cost-saving mandates are increasing, workloads continue to grow, and expectations around efficiency and modernisation keep rising. Yet time and headcount remain finite.

Against this backdrop, technology is no longer optional. It is a core lever for performance. Recent research shows that 35% of global CLOs now rank operational efficiency as their top strategic priority, and 41% have received direct cost-cutting mandates. The most effective teams respond by using the right tools, and by combining legal technology with the right mix of legal resources.

At Clario, we work at the intersection of people, process and technology. We understand the legal tech market deeply and bring an independent, vendor-agnostic perspective grounded in real in-house experience. Our Legal Tech Navigator is built for stretched teams. It uses a filter-led approach to translate your requirements into a focused shortlist of legal technology options that are genuinely worth your attention.

This report captures the outcome of that process. It presents the three best-fit tools identified through the Navigator, compared side by side against your needs. Key differences, practical considerations and decision risks are clearly surfaced, so you can move forward with confidence. The goal is simple: save time, reduce uncertainty, and help you invest in technology that will actually stick.

HOW THE NAVIGATOR TURNS COMPLEXITY INTO CLARITY

About Clario

Finding great lawyers, made easy

Secondments

Clario is an Inhouse legal secondment business, with a primary focus on connecting clients in Sydney and Melbourne with Australian-qualified corporate and commercial lawyers.

Our clients love how easy we are to work with. We bring fresh thinking and market insight to every engagement, consistently delivering great value.

Recruitment

We can also support your permanent hiring strategy.

This includes a unique secondment model designed to seamlessly transition into a permanent role upon completion, ensuring alignment and long-term fit for both the client and the lawyer.

Consulting

At Clario, we are driven by innovation and deeply understand the transformative impact of technology and AI-powered solutions on legal team performance.

Our team provides strategic insight into the legal technology landscape and delivers informed, impartial technology recommendations grounded in comprehensive market knowledge.
